**CORRECTED**  
**RESPONSE TO OFFICIAL ACTION DATED JULY 6, 2004**

Dear Sir:

1. (currently amended) A lighted image display, comprising  
an image frame box, said image frame box comprising,  
a front panel, said front panel comprising a transparent portion that is  
not imaged, and a lower opaque portion,  
  
a rear panel that is spaced apart from said front panel, said rear panel  
comprising an image that is viewable through said transparent portion  
of said front panel,  
  
an electrical light that is disposed between said front panel and said  
rear panel, wherein said electrical light is positioned between said
